

Profile #: CH1835708  
Generator: Devore and Devore  
Contact name: Brett Bowyer

Used oil containing more than 1,000 ppm total halogens is presumed to be a RCRA hazardous waste because it has been mixed with halogenated hazardous waste listed in Subpart D of Part 261, Title 40, CFR. Generators of used oil shall determine whether used oil managed by them contains more than 1,000 ppm total halogens by testing the used oil or applying knowledge of the halogen content of the used oil in light of the materials or processes used.

A generator who elects to apply knowledge in lieu of testing to determine if used oil exceeds 1,000 ppm total halogens shall do **ALL** of the following:

1. Review the product oil label, the material safety data sheet, the manufacturer's specification for the product oil, or consult with the manufacturer of the product oil.

*I have determined the halogen content of my used oil is less than 1,000 ppm based on review of the product MSDS/SDS documents, labels, manufacturer's specifications, and/or by consultation with the manufacturer of the products used.*

Yes ☐ No ☐ (mark the appropriate box)

2. Determine if the halogen content of the used oil is due to its use based on an assessment of whether the equipment or process generating the used oil introduces any halogenated substances into the used oil.

*I have determined the halogen content of my used oil is less than 1,000 ppm based on review of the equipment used and process generating it.*

Yes ☐ No ☐ (mark the appropriate box)

3. Determine the halogen content of the used oil resulting from the mixing of the used oil with halogenated substances.

*I have determined that the halogen content of my used oil resulting from any mixing with halogenated substances is less than 1,000 ppm.*

Yes ☐ No ☐ (mark the appropriate box)

- **I have determined that the total halogen content of my used oil is less than 1,000 ppm based upon the criteria listed in subsection 1-3 above**

Yes ☐ No ☐ (mark the appropriate box)

Changes in the process of generation or characteristics will necessitate submission of a new profile for the waste stream.

*I certify that this information is true, accurate and complete.*
